Automotive Steel Hyundai Steel

Hyundai Steel produces hot-rolled coil followed by cold rolling in Hyundai Hysco. The cold-rolled automotive steel is used to make cars in Hyundai Motor and KIA Motors. The next step is out-of-service cars turning into the scrap for recycling at the Automotive Recycling Center.

AUTOMOTIVE STEEL - Hyundai Steel

Hyundai Steel Co., Ltd, or HSC (formerly known as Hyundai INI Steel, and before that, Incheon Iron & Steel Co., Ltd.) is a steel making company headquartered in Incheon and Seoul, South Korea, and a member of the Hyundai Motor Group. Established in 1953, it is the oldest steel making company in Korea.

Hyundai Steel - Wikipedia

Hyundai Corporation provides a wide range of steel products including hot and cold rolled steel products, rear panels, coated steel sheets, steel pipes, bar steel, section steel, and stainless steel. We also offer nonferrous metals such as aluminum and zinc and half-finished products such as slabs, billets, blank coins, and bank note papers.

Steel | Hyundai Corporation

Hyundai is the only global automaker that has its own captive integrated steel works, and it recently spent \$5.5 billion building the first covered production system.

Hyundai Sees Bright Future in Auto Steel | WardsAuto

The steel unibody has integrated crumple zones and a high-tensile front sub-frame designed to work together to reduce the forces that typically reach the passenger compartment. The center pillars serve as the anchors of a ring structure which improves overall side structure stiffness while also creating more room for the door armrest and seat.

Hyundai's Tucson - WorldAutoSteel

The only manufacturer with its own integrated steel works, Hyundai Motor has heavily invested to make it one of the most advanced steel production facilities in the world. The biggest benefit of this is the ability it has given the company to develop proprietary ultra-high strength steel that can give Hyundai vehicles a crucial advantage.
