Minolta manuals

It's one of the very first manual focus SLR lenses that I ever bought and I used it together with a 50mm Minolta prime lens and it covered pretty much every need. Today, the Minolta 35-70 fills that role as the 24-70 isn't quite up to the quality of the other two Vivitar lenses. Unfortunately not all Vivitar Series 1 lenses are gems.

Minolta Manual Focus Teleconverter Camera Lenses for sale ...

Like any teleconverter, it will not auto-focus with a slower lens except on the very brightest days, but should do so with a faster lens. I've had no problem whatsoever using it with the manual focus mode of my Maxxum 7 (the focus indicator in the viewfinder displays proper focus). The pictures I've taken are acceptable.

Look for these Minolta brand descriptions and part numbers: Minolta 2x M/A CONVERTER-S 2583-107.

Remounting Minolta MD Lens to AF | Photo.net Photography ...

The Minolta SR-mount was the bayonet mounting system used in all 35 mm SLR cameras made by Minolta with interchangeable manual focusing lenses. Several iterations of the mounting were produced over the decades, and as a result, the mount itself was sometimes referred to by the name of the corresponding lens generation (f.e. "MC", "MD" or "X-600") instead.
