## **(PDF) The Effect of Social Media on Identity Construction**

Social identity theory is built on three key cognitive components: social categorization, social identification, and social comparison. Generally, individuals wish to maintain a positive social identity by maintaining their group's favorable social standing over that of relevant out-groups.

## **Social Identity Theory: Definition, Examples, Impact**

In particular, Mead's theory symbolic interactionism, which suggests that social interaction is responsible for the construction of identity, was highly influential. In the late 1960s, three separate intellectual movements came together to form the foundation of social constructionism.

## **Social Constructionism Definition - ThoughtCo**

Social identity is a person's sense of who they are based on their group membership(s). Tajfel (1979) proposed that the groups (e.g. social class, family, football team etc.) which people belonged to were an important source of pride and self-esteem. Groups give us a sense of social identity: a sense of belonging to the social world.

## **Social Identity Theory | Simply Psychology**

Social identity theory, in social psychology, the study of the interplay between personal and social identities. Social identity theory aims to specify and predict the circumstances under which individuals think of themselves as individuals or as group members. The theory also considers the consequences of personal and social identities for individual perceptions and group behaviour.

## **Identity in question: View as single page**

The social identity theory, when applied to sports fans, helps to explain their behavior. The social identity theory states that people are motivated to behave in ways that maintain and boost their self esteem. Having high self esteem is typically a perception of oneself as attractive, competent, likable and morally good person.
